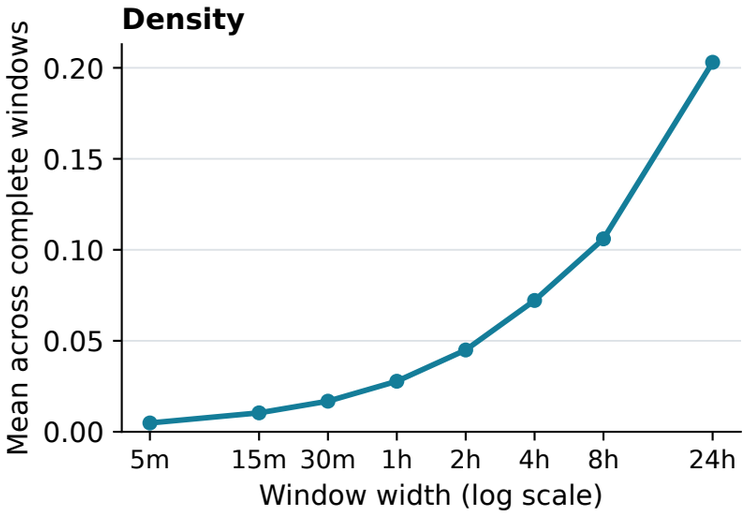
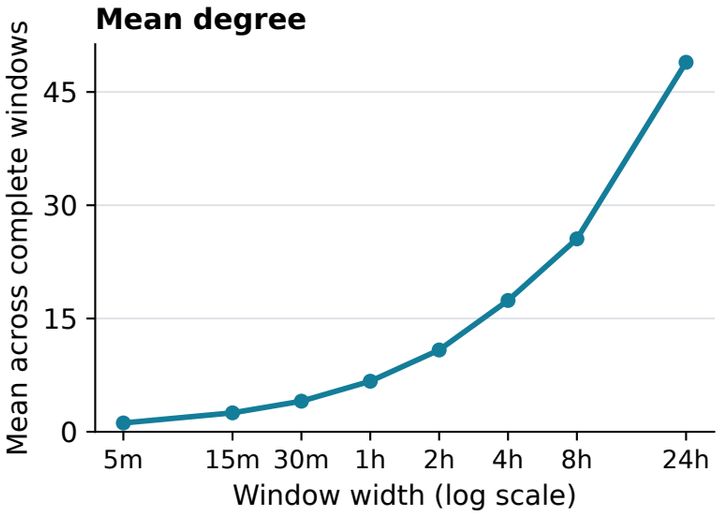
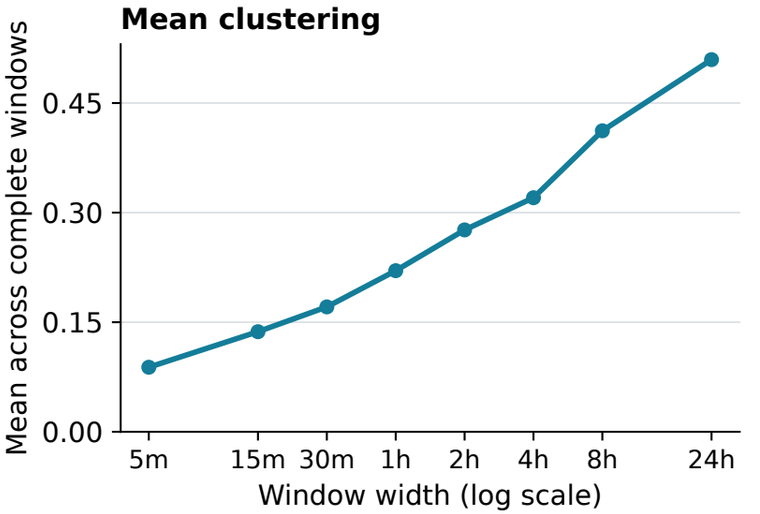
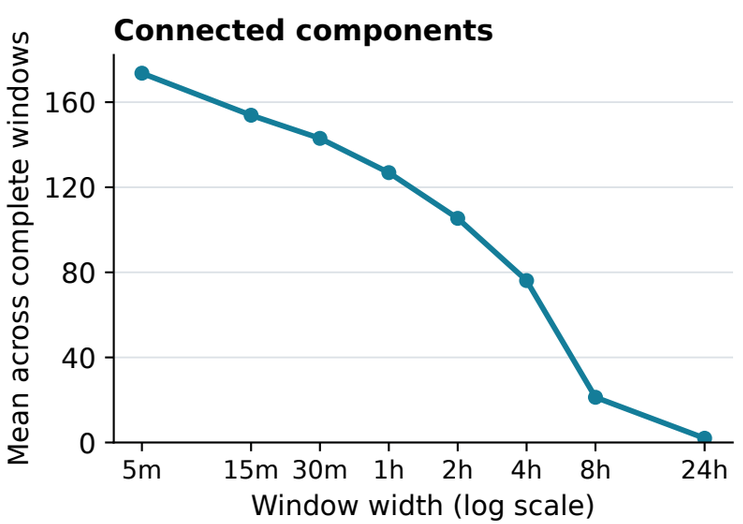
PS | How window width changes observed structure

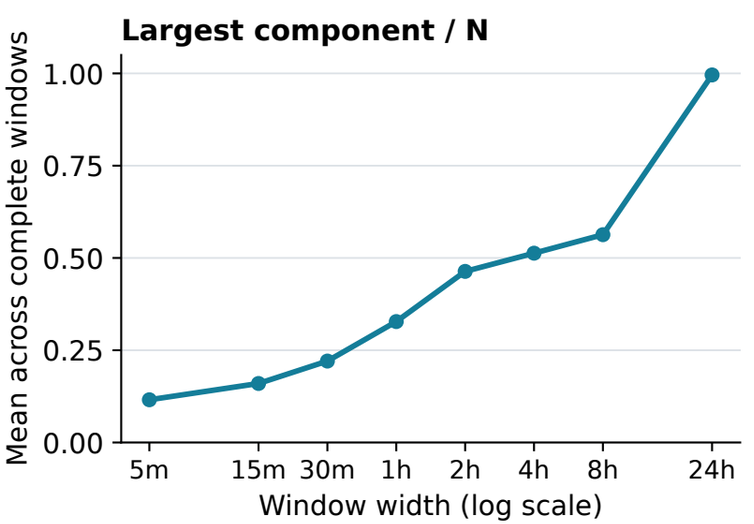
Undirected contacts | Fixed N = 242, including isolates | Empty windows retained

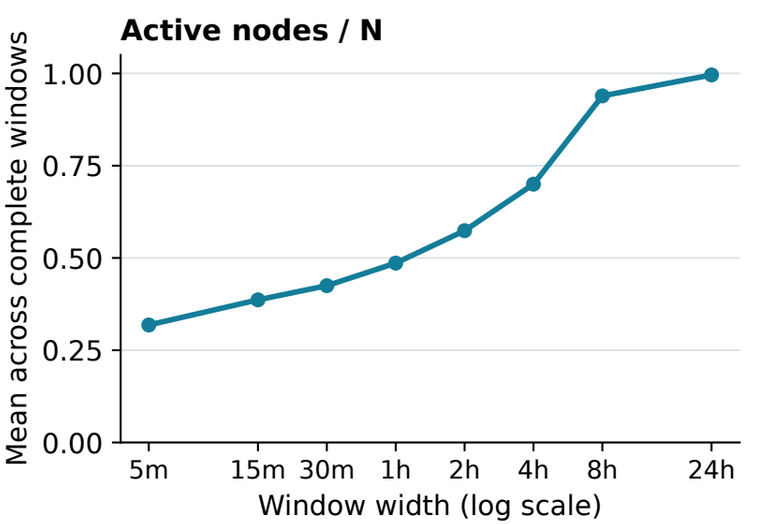












Complete windows at each scale: 5m: 389 | 15m: 129 | 30m: 64 | 1h: 32 | 2h: 16 | 4h: 8 | 8h: 4 | 24h: 1

24h has one complete window. Chronological gaps retained; monitoring coverage is not inferred.
